Cooking Tips

Whilst perfecting the recipes used in this cookbook, we discovered some top tips for using the Go Eco Adventurer 5 Glamping Stove.

To help you get the most out of your stove, we have put together our five top tips.

1 Log Sizes

The maximum size of log this fire accommodates is 18cm long.

2 Compatible Bakeware Sizes

The maximum size of tray this fire accommodates is a 22cm casserole tin or up to a 27 x 22cm baking tin.

3 Pre-heating The Oven

If you are doing a recipe that involves using the hob and the oven, get the oven up to temperature first then move to one side. When you get back to the oven, it will take less time to heat up again.

4 Using the Heating Controls

To control the temperature of the fire, move the bottom slider to control how fast the logs burn, making sure to open the top slider to the right, this makes sure the glass doesn't stain.

5 Using the Splashback

If you are doing a recipe on the hob that is likely to spill over the edge of the pan, to prevent extra cleaning add the splashback behind the hot plate.
