Add new fire

Lounge

Select your fire from the list of fires that you have already set up.  
(This Screen may be skipped if the App has been connected to the fire before).

The App is now ready to use.

# App. Display

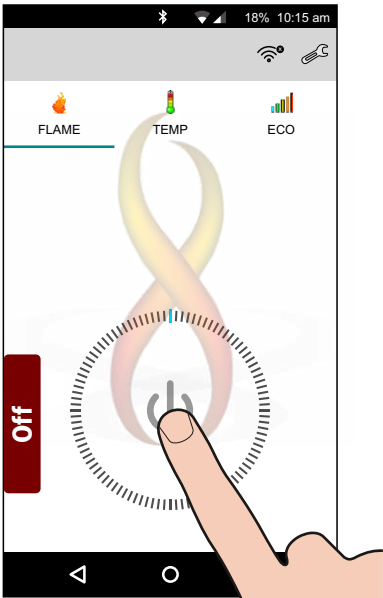

# Starting The Fire

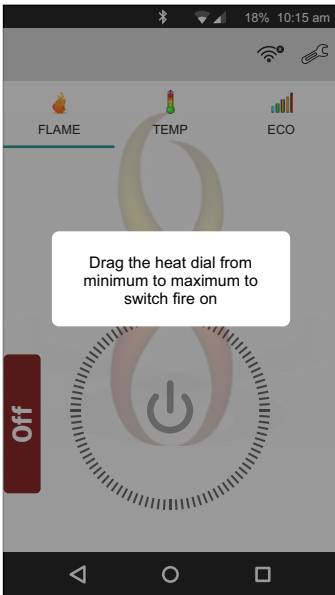

## **Note:**

For Safety reasons there is a three stage process to start the fire as shown in the next three illustrations.

First press the power symbol  in the centre of the dial.

The above message will be displayed for a few seconds.

Secondly drag the dial clockwise from minimum to maximum.

Finally select **Yes** and the fire will start the ignition process.

The fire will take a few seconds to start.

Once the fire has lit it needs time to warm up. Condensation may form on the glass until it has warmed up.

# Flame Mode

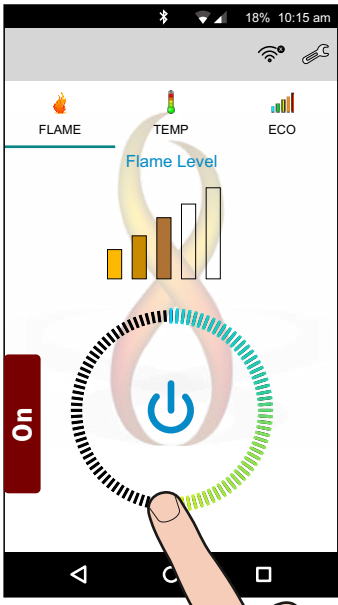

(manual)

**FLAME**

You can now adjust the flame height using the dial.

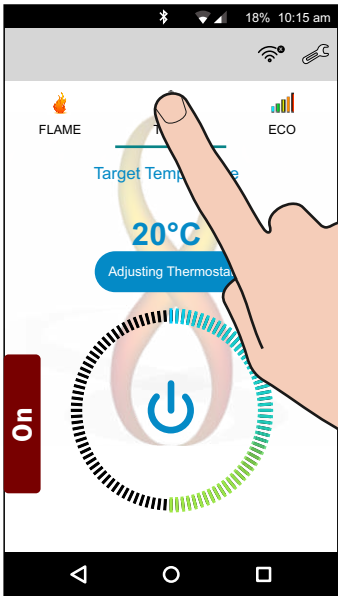

Drag the dial until the desired flame height is achieved.

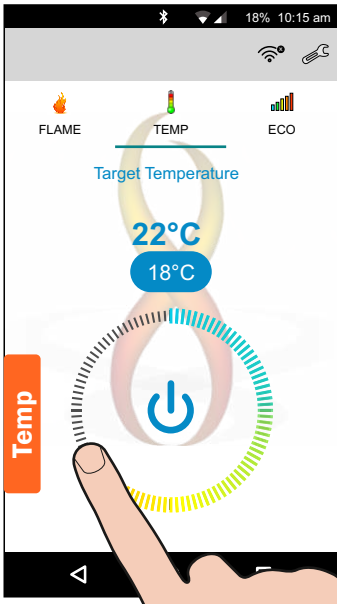

# Thermostatic Mode

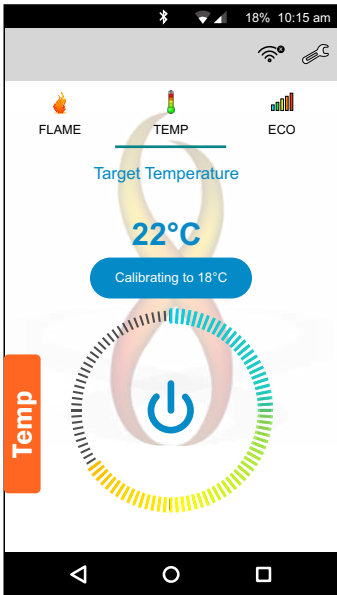

TEMP

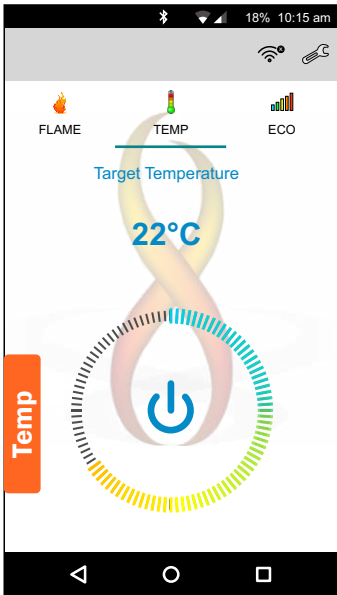

Select **Temp** mode by tapping the **Temp** icon  at the top of the display.

Now drag the dial around to set the desired temperature (shown in blue message bubble). Then lift your finger.

The thermostat will now be adjusted to the selected temperature.

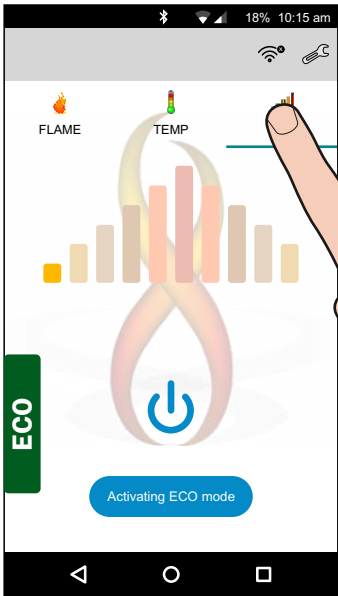

The flame height will now be automatically adjusted up and down to maintain the target temperature.

# ECO Mode

ECO

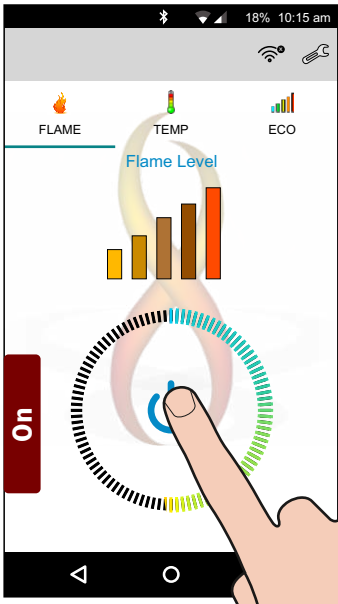

Select **ECO** mode by touching the **ECO** icon  at the top of the display.

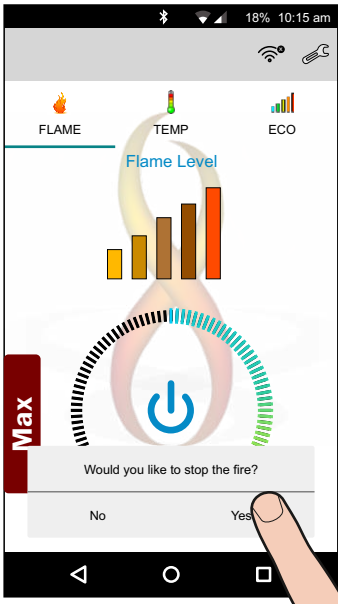

In **ECO** mode the flame height will automatically be adjusted up and down.

# Stopping The Fire

To stop the fire first tap the Power Button symbol 

Now tap **Yes** to confirm.

The fire has now been stopped.

# Disconnecting The App From The Fire

To disconnect the app from the fire tap the Wi-Fi disconnect icon  at the top of the screen.

Charlton & Jenrick

Add new fire

Lounge

The app is no longer connected to the fire. You can reconnect to the fire at anytime by selecting it from the list.

# Version Info, Reset Wi-Fi And Links

To view version information etc. or factory reset the Wi-Fi module tap the Maintenance icon  at the top of the screen.

To return to the previous page tap the **BACK** ◀ button.

To reset the Wi-Fi module to factory default settings select **Reset Wi-Fi.**

Google

Infinity Fires

The Wi-Fi connection will be reset and the App will close. You will now have to set up the Wi-Fi again.

# Direct Connect

This method of connection can be used to control the appliance if there is no Wi-Fi Network installed in the property or in the event of a Wi-Fi Network Failure
