Infinity Remote Android App Setup & Activation Instructions

Introduction

This document will guide you through the process required to connect your Wi-fi enabled Infinity Fire to your home network so that you can control it using the Infinity Remote app on your smartphone.

Requirements:

An android device capable running Android Ver. 4.1 (Jelly Bean) - API level 16 (2012) or newer.

Minimum router specification

2.4GHz - 54g (802.11)

Recommended router specification 2.4GHz - Wireless N (802.11N) or better.

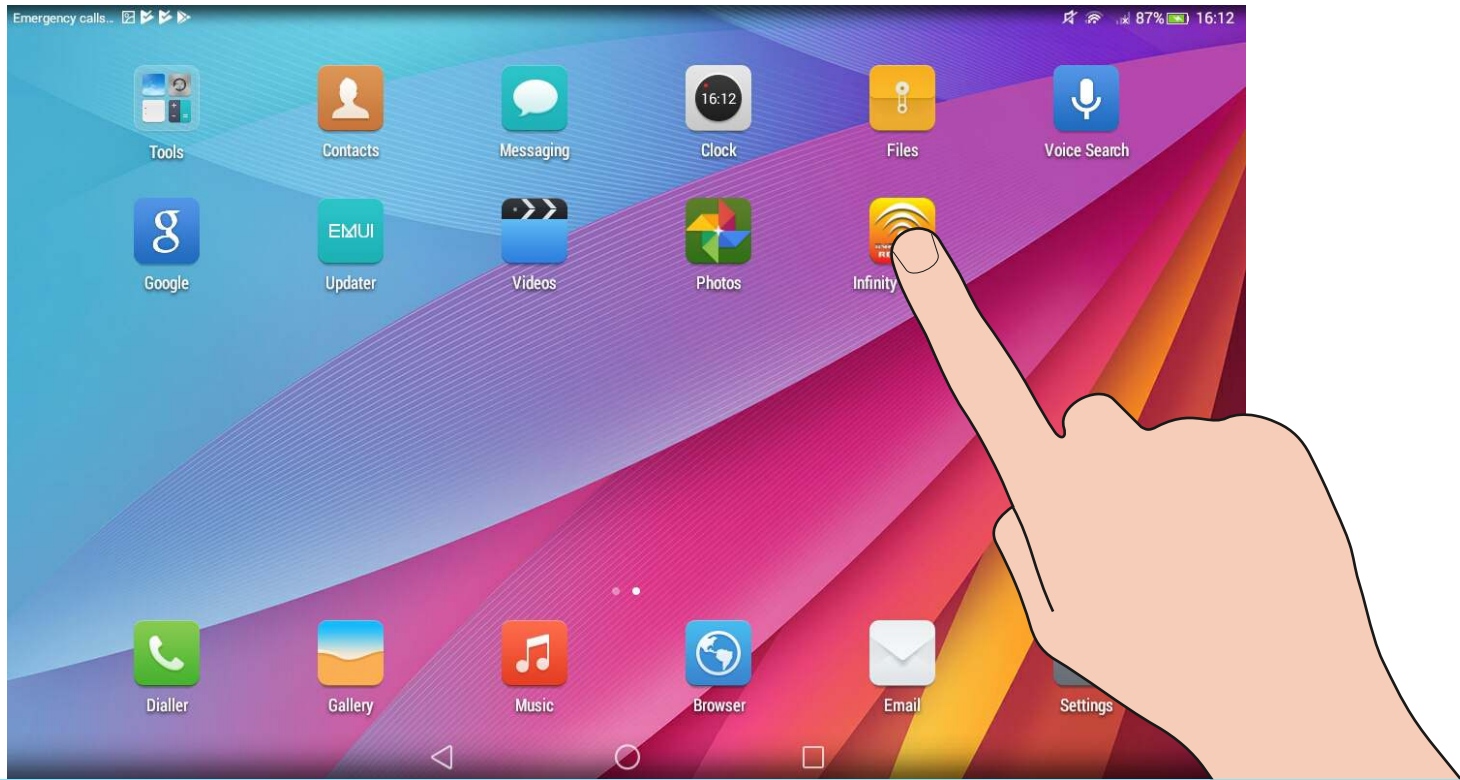

Note: If you have a weak Wi-Fi signal in the room where the fire is installed you may need to consider adding a Wi-Fi extender to your home network.

To download the app search for
Infinity Remote
at Google Play.

For more information goto

Skip

OK

Complete the registration and tap **OK** to complete Activation.
If you **Skip** you will be presented this form every time you connect to the fire.

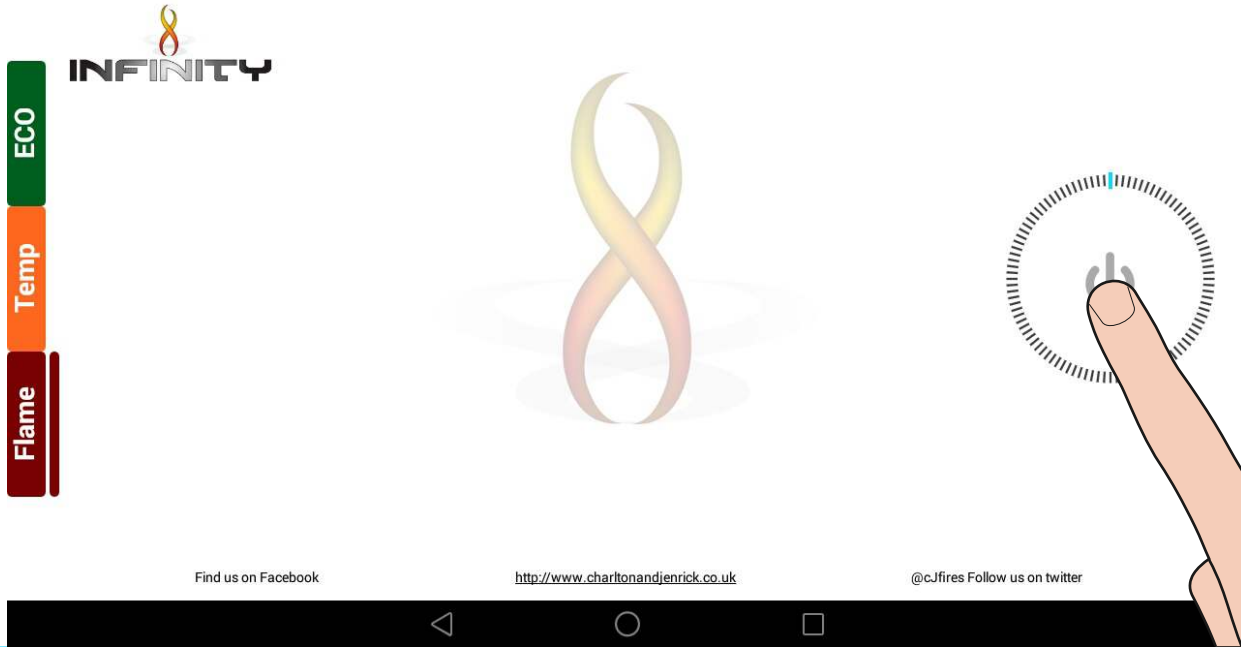

Congratulations you have successfully connected your
Infinity Fire to the network.

Please proceed to the next stage, starting the fire and
calibrating the temperature sensor.

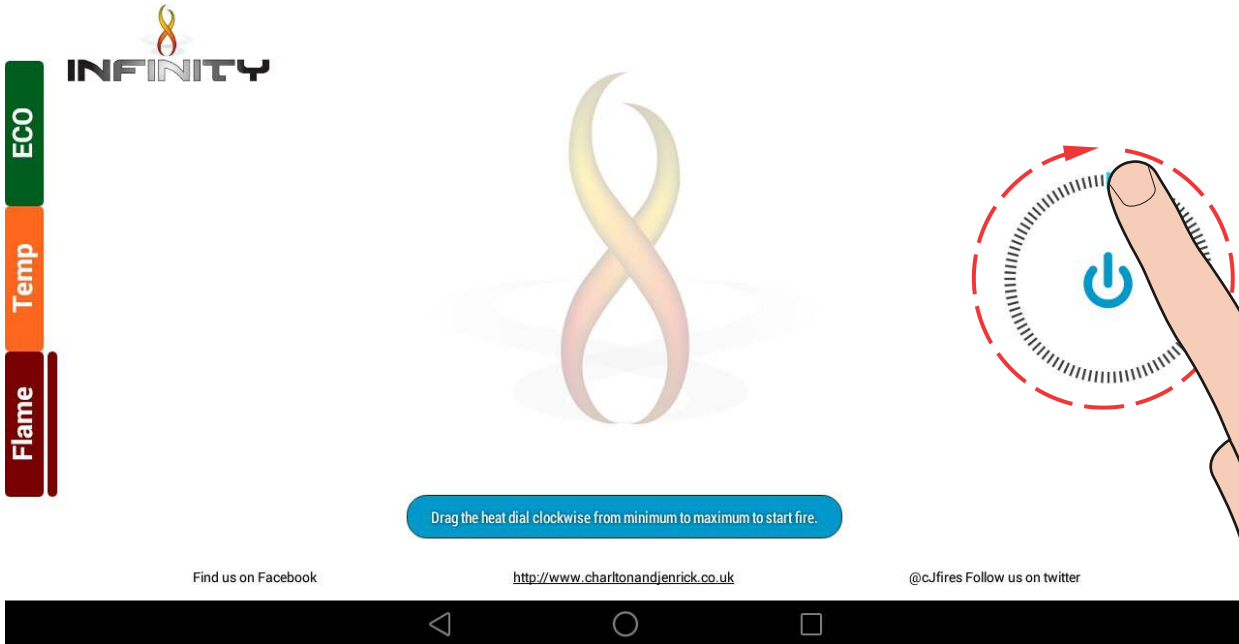

Starting The Fire

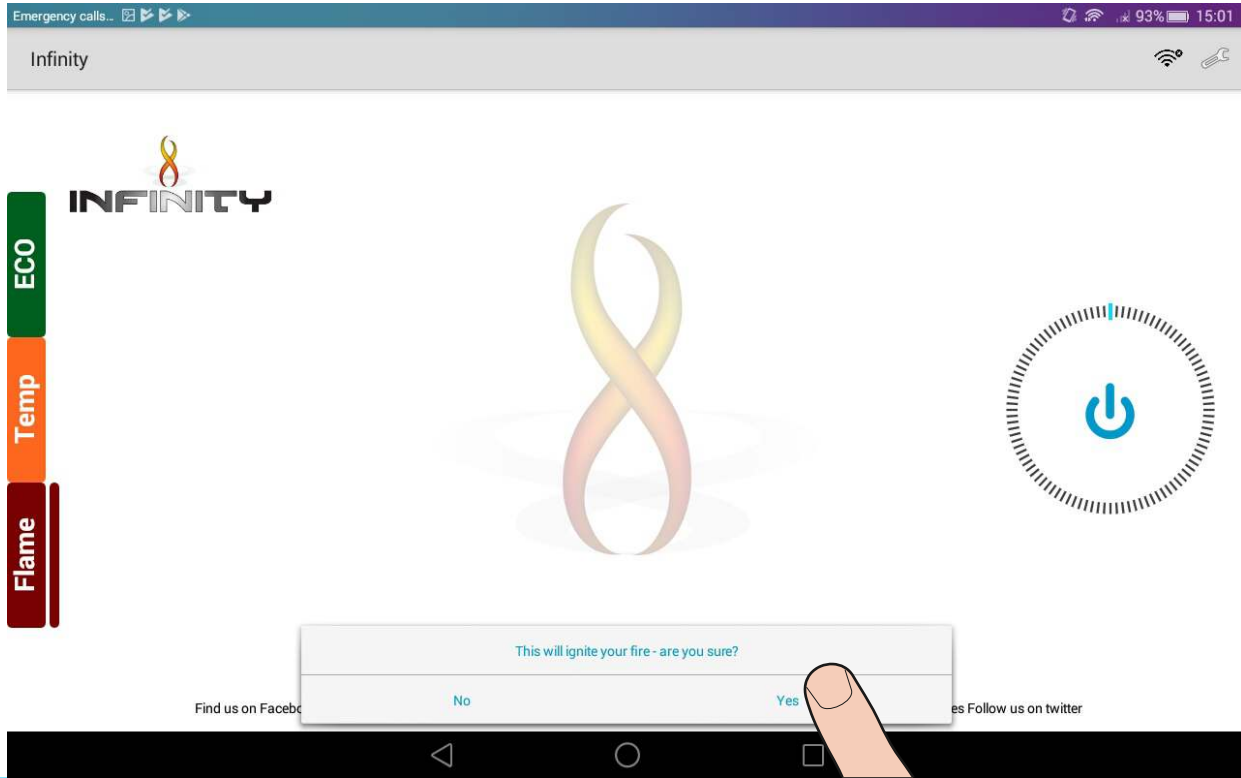

For safety reasons there is a three stage process to start the fire as shown in the next three illustrations.

First press the power symbol  in the centre of the dial.

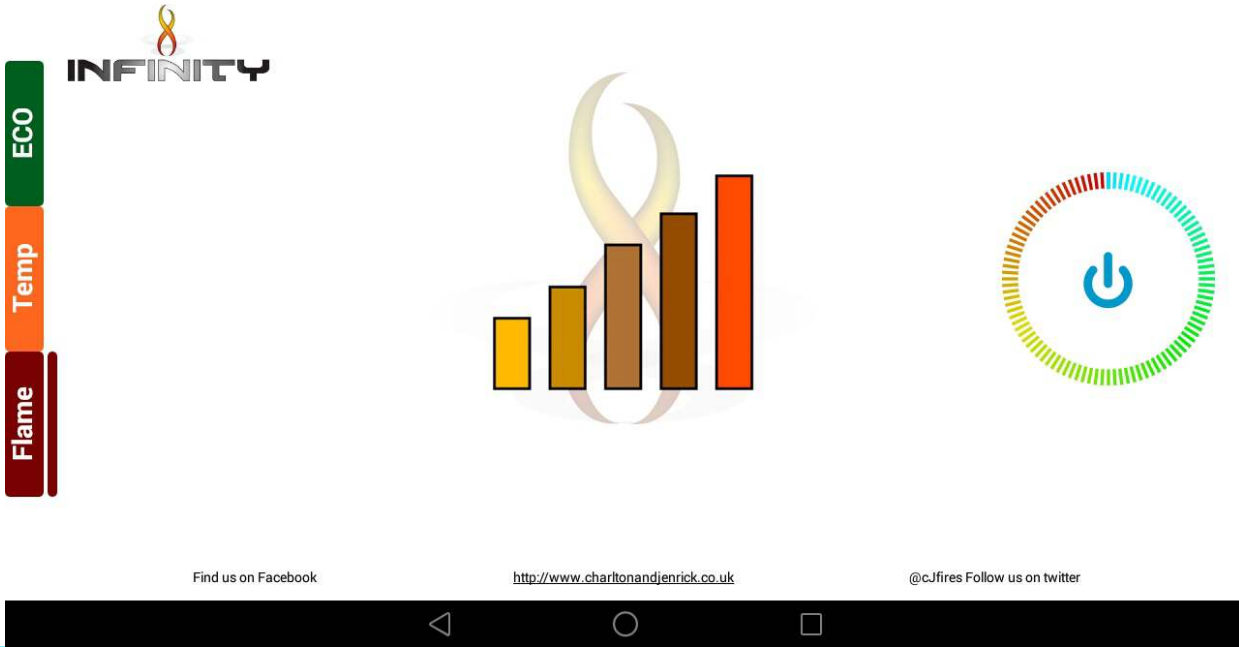

Secondly drag the heat dial clockwise from minimum to maximum.

Finally select **Yes** and the fire will start the ignition process.

The image shows a mobile application interface for 'INFINITY'. On the left, there is a vertical sidebar with three buttons: 'ECO' (green), 'Temp' (orange), and 'Flame' (dark red). The 'INFINITY' logo is at the top left. The main area features a bar chart with five bars of increasing height, colored yellow, gold, brown, dark brown, and orange. A large, stylized flame icon is overlaid on the chart. To the right is a circular power button icon with a multi-colored ring. Below the chart is a blue button labeled 'Starting fire...'. At the bottom, there are three links: 'Find us on Facebook', 'http://www.charltonandjenrick.co.uk', and '@cJfires Follow us on twitter'.

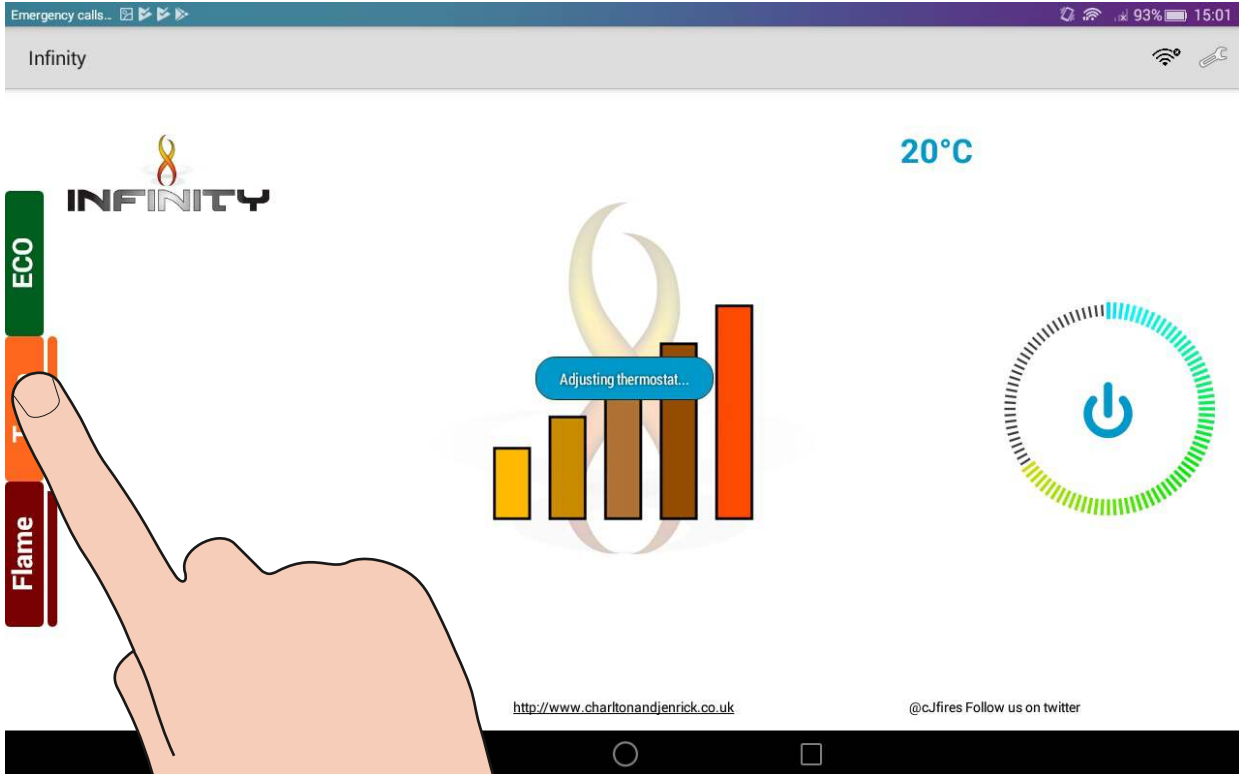

The fire will take a few seconds to start.

Once the fire has lit it needs time to warm up. Condensation may form on the glass until it has warmed up.
You can now adjust the flame height or change modes.

Calibrating The Thermostat

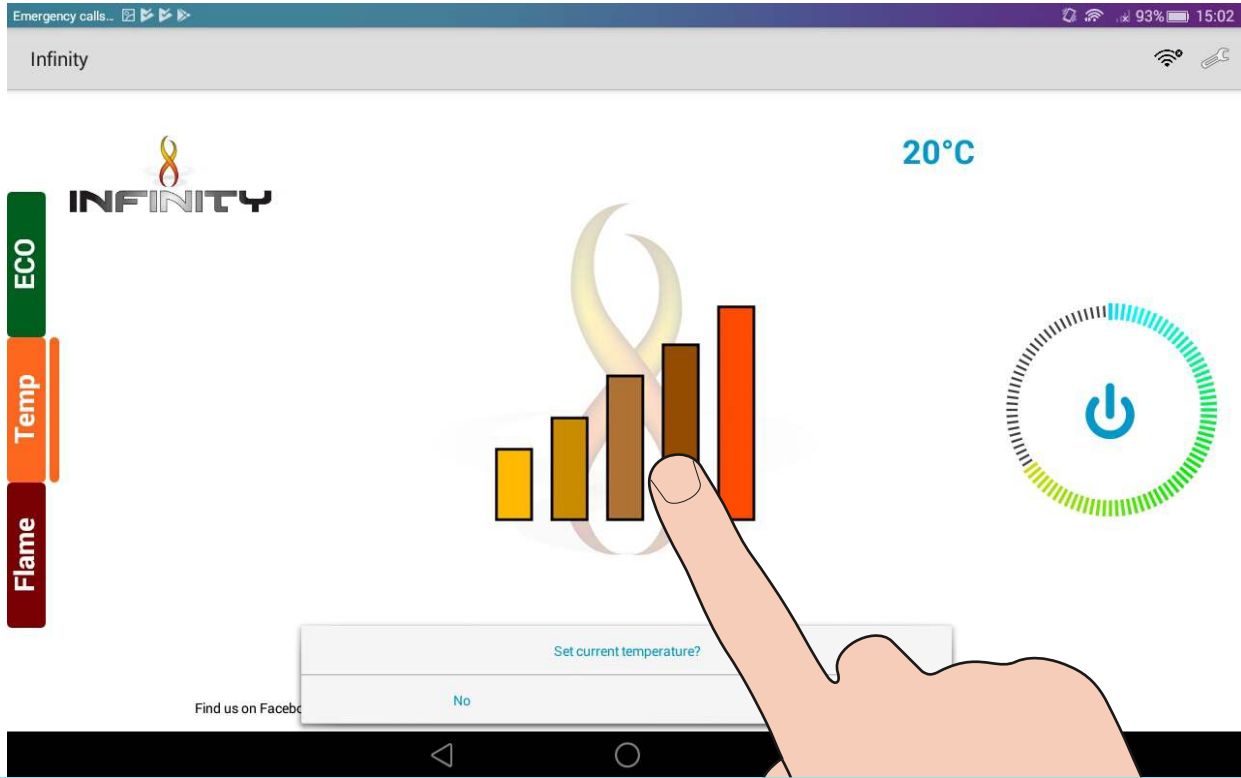

To calibrate the thermostat tap the **Temp** mode tab

The app is now in Temp mode.

Press and hold the **Temperature Bar Chart** area of the screen until a **Set current temperature** message screen appears.

Set current temperature?

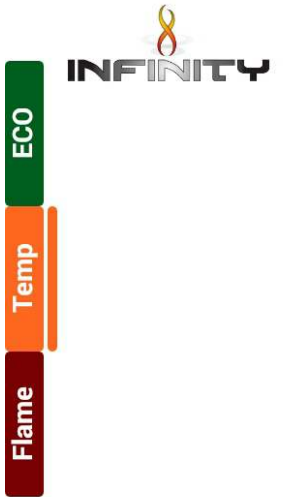

No Yes

Find us on Facebook Follow us on twitter

Select Yes to calibrate the thermostat.

The interface features a vertical sidebar on the left with three buttons: 'ECO' (green), 'Temp' (orange), and 'Flame' (dark red). The main display area shows the 'INFINITY' logo at the top left. In the center is a bar chart with four bars of increasing height, overlaid with a large, stylized flame icon and a blue bubble containing '17°C'. To the right of the chart, the current temperature '20°C' is displayed in blue. Further right is a circular dial with a blue power button icon in the center and a green-to-blue gradient around the perimeter. A hand is shown touching the dial. At the bottom, there are three links: 'Find us on Facebook', '<http://www.charltonandjenrick.co.uk>', and '@cJfires Follow us on twitter'. The bottom of the screen shows the Android navigation bar.

Now drag the dial around to set the current room temperature. Then lift your finger.

20°C

Your fire is now ready to use.
You can re-calibrate the unit at anytime by repeating the procedure.

Stopping The Fire

To stop the fire first tap the Power Button symbol

The interface features a vertical sidebar on the left with three buttons: 'ECO' (green), 'Temp' (orange), and 'Flame' (red). The main area contains the 'INFINITY' logo, a bar chart with five bars of increasing height (yellow, brown, dark brown, white, white), and a circular power button icon with a blue center and green segments. A dialog box at the bottom asks 'Would you like to stop the fire?' with 'No' and 'Yes' options. A finger is shown tapping the 'Yes' button. Social media links for Facebook and Twitter are visible at the bottom of the dialog.

Secondly select **Yes** to confirm.

Lounge

The image shows a smart thermostat interface for a device named 'INFINITY'. On the left, there is a vertical control bar with three segments: 'ECO' (green), 'Temp' (orange), and 'Flame' (dark red). The 'INFINITY' logo is at the top left, featuring a stylized flame icon. In the center is a large, glowing infinity symbol. To the right is a circular power button icon. At the bottom, there are three links: 'Find us on Facebook', '<http://www.charltonandjenrick.co.uk>', and '@cJfires Follow us on twitter'. The interface is displayed on a mobile device screen, with a status bar at the top and an Android navigation bar at the bottom.

The fire has now been stopped.

For more information on operating the fire please read the operating instructions.
